DAILY FEEDING CHART (Maintenance)	
CLASSIFICATIONS	THE EDGE™ CRYSTAL POWDER
Dogs & Cats (<10 lb)	¼ tsp/day
Dogs & Cats (11-20 lb)	¼-½ tsp/day
Dogs (21-60 lb)	½-¾ tsp/day
Dogs (61-100 lb)	¾-1 tsp/day
Dogs (100+ lb)	1-1¼ tsp/day

Introduce gradually over a 6 day period starting with 1/8 teaspoon per day and working up to the appropriate feeding rate. Larger dogs will take longer to work up to the feeding rate – stay the course and work up by 1/8 teaspoons a day until the maintenance feeding rate is reached.

**Feeding rates can be doubled to help promote healing until the issue has been resolved and then work back down to the maintenance feeding listed in the chart above. Add THE EDGE™ to wet food or drizzle dry kibble with olive oil or water and add crystal powder on top.**

Remember, this food doesn't treat or cure anything. It helps rebalance the blood chemistry and provide essential micronutrients that are lacking in our soils, thus positively affecting every cell of the body.
